

# *Trilium grandiflorum* - Petals & Sepals templates

## **Petals**

The petals stand erect, curving slightly outward. Overlapping at their base the petals form a funnel-shaped, odorless flower. The throat of the flowers can have a yellow cast, as the bloom ages the petals can take on a light pink tint.

## **Sepals**

The sepals are the outermost layer protect the developing flower bud, as the bloom emerges the sepals curl back, creating a star pattern when viewed from above.
