

Symphyotrichum grandiflorum - Templates

The sepals and bloom stem wrap can be cut from 80 gram moss green paper (Cartotenica Rossi #366 or Lia Griffith "Cypress" are examples) Select a heavier paper for the steam leaves. All leaves are positioned approximately .5" apart, on opposite sides of the stems. Wrap the main stem in light brown paper (Cartotenica Rossi #359 or Lia Griffith "Espresso" are examples).

The ray florets lighten as they age. You can find paper packs in a range of colors from Lia Griffith or Petals and Pearls. Alternately, you can select one darker color and lighten it by brushing it with a Pan Pastel "Titanium White".
